TECHNOLOGIES DEVELOPMENT HISTORY

Tatyana Petrovna Konopleva is the,

and a leading expert in bio-resonance. Dr. Konopleva has run the company for more than 20 years. Under her management many new compact and simple devices have been produced and the Company is now represented in Europe and Central Asia. She has elevated the application of bio-resonance technologies to a new level. Her belief in the comprehensive approach to health protection and recovery has made the technology more accessible for ordinary people. Dr. Konopleva continues to teach, educating the public in the correct and efficient use of bio-resonance technologies.

ABOUT THE TECHNOLOGIES

DeVita technologies are based on bio-resonance therapy methods developed by Russian and foreign scientists. They work on two basic principles:

- The Recovery principle is embodied in the devices DeVita Ritm Base, DeVita Energy and DeVita Cosmo. These devices generate electromagnetic field impulses in the low frequencies range, which coincide with physiological and regulatory frequencies of our body. Each of the programs creates the resonance in the relevant organs and systems.
- The Antimicrobial principle is embodied in the device DeVita AP Base. Its action is based on the emission of electromagnetic waves which resonate with the vibrations of various parasites: from viruses to helminthes. DeVita AP Base acts against pathogens that gives the body the opportunity to function naturally unaffected by external factors or conditions.

SCIENTIFIC DEVELOPMENT

DEHolding Company has been in development for more than 20 years. The company began its exploration of the devices based on the research of the following esteemed scientists:

Alexandr Gavrilovich Gurvich

The scientist who established the fact that any organism consisting of many cells has an electromagnetic field generated by those cells. As a result, the electromagnetic field of the individual organism comes into existence, and this field is essential for the organization of physiological processes/

Royal Raymond Rife

Fixating individual frequencies of various pathogens and inserting them into resonance, Rife showed a new method of struggle against dangerous microorganisms. It is worth noting that such exposure is safe for human cells. The scientist has created an extensive list of frequencies of microorganisms affecting the human body.

Reinhold Voll

Voll found that therapeutic effect of electrical currents at acupuncture points depend on their frequency. And even the slightest change in frequency may have different therapeutic effects. Contributions to the development of this study were also made by such scholars as F. Kramer, O. Klaus and P. Schmidt.

Helmut Schimmel

Schimmel, the founder of the modern BRT-method, diminished the number of working points down to one and transformed the principle of measurement "placing the organs into ampoules". Before Schimmel, conditions of the organs were measured via different points. Now only one "reproducible" point is the source of information and the drug-indicators are tested directly at this point.

DeVita technologies – we create our healthy future together!

THE HOMO-TOXICOSIS THEORY OF DR. RECKEWEG

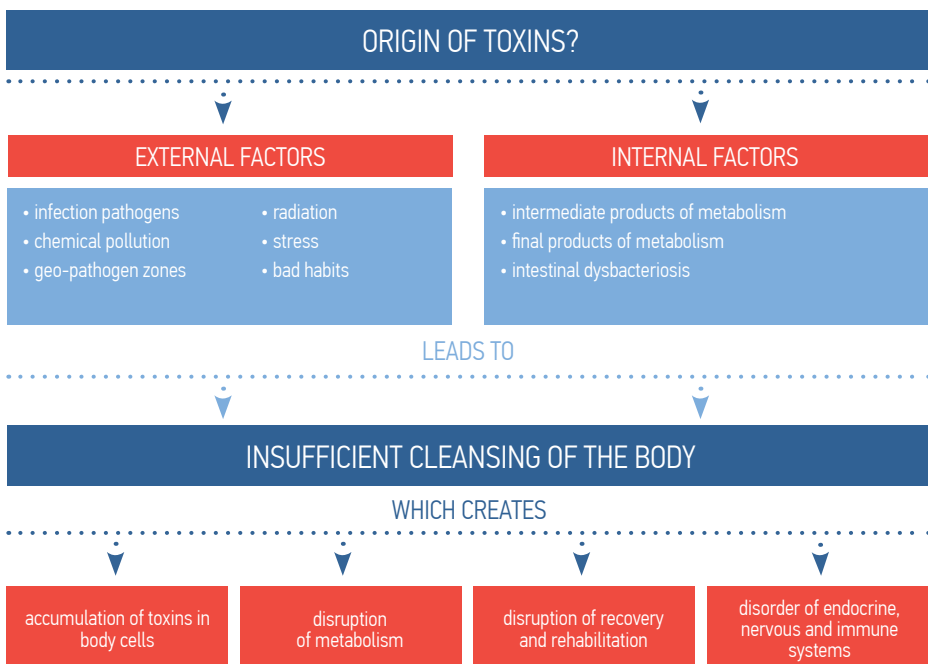

Heinz Heinrich Reckeweg,

MD, researcher.

Dr. Reckeweg created the homo-toxicosis theory which considers toxins as the main source of health problems. Dr. Reckeweg was the founder of the new direction in health improvement and recovery, which puts at the forefront the body's cleansing and detoxification

DEHolding Company has successfully worked with this theory for a number of years: all the drainage programs in DeVita devices are created according to the method of Dr. Reckeweg, who believed that all human illnesses are the consequence of the accumulation of homo-toxins. Toxic substances (homo-toxins) cause defensive reactions in the human body, which are manifestations of the disease. Homo-toxins, as considered by Dr. Reckeweg, are chemical, bio-chemical, physical and psychical factors that disrupt human health. According to the homo-toxicosis theory, the toxins can have either external or internal origins.

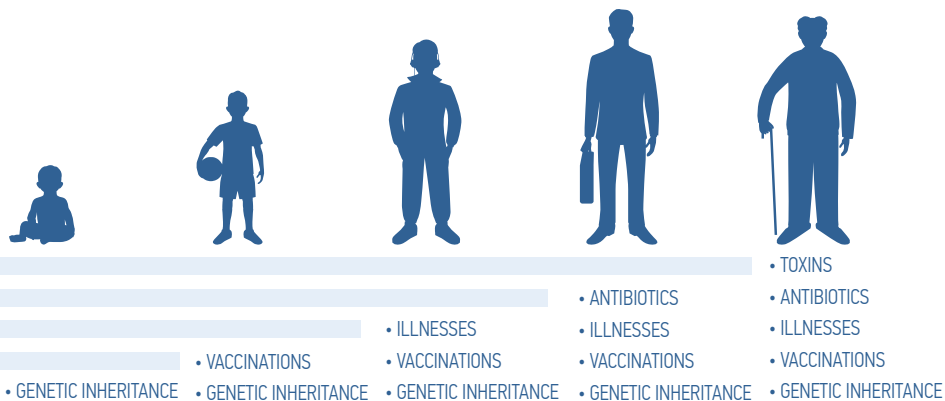

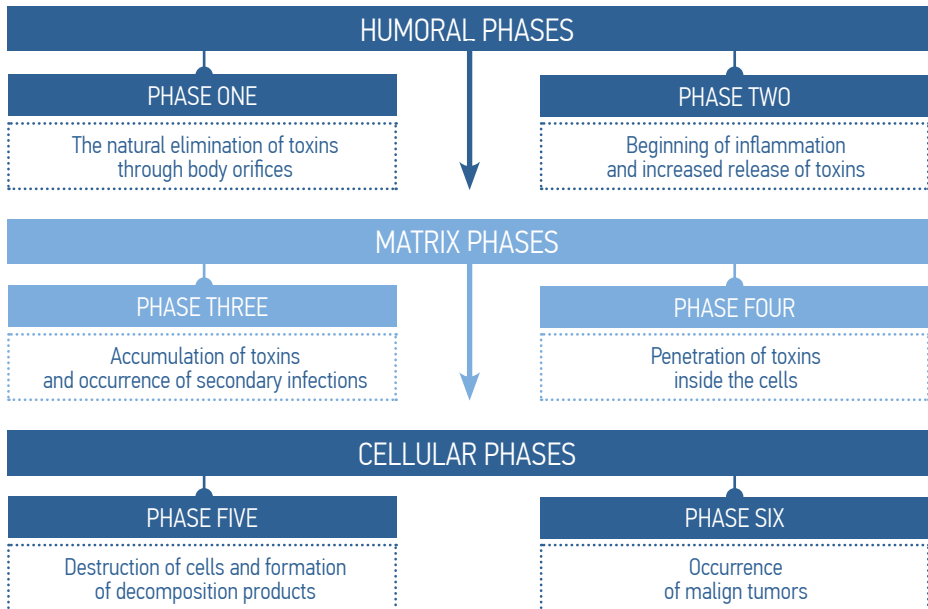

HOW INTOXICATION EMERGES?

HOW ILLNESS DEVELOPS?

Dr. Reckeweg identified 6 phases of the passage of homo-toxic reactions. Each phase reflects a lesion of deeper structures of the body and more severe changes. For the first two phases the body detoxifies itself adequately without harm for its livelihood. During the third and fourth phases the toxins accumulate in the body tissues which become super-saturated with them. At the fifth phase irreversible consequences begin which can lead to very sad circumstances.

THE SIX PHASES OF DEVELOPMENT OF THE BODY'S REACTION TO TOXINES

HOW THE TECHNOLOGIES WORK

According to the homo-toxicosis theory the recovery process follows in reverse order. It is very important not to miss all the "points of the recovery". DeVita technologies allow the implementation of maximum deep cleansing of the body which not only withdraws the symptoms but leads to the complete elimination of the problem.

ADVANTAGES OF THE DEVICE

PRINCIPLE OF OPERATION

DeVita technologies are based on irradiation of super-weak electromagnetic waves which influence the whole body and individual organs due to the bio-resonance effect. The bio-resonance is strengthening the natural oscillations of organs due to electromagnetic waves of the same frequency. Bio-resonance irradiation of the DeVita devices can be estimated by an oscillograph, the instrument for monitoring and measuring the electromagnetic waves.

ELECTROMAGNETIC ACTION OF DEVITA AP BASE

The action is adjusted to oscillations of pathogenic microorganisms. Anti-parasite irradiation deactivates pathogenic microbes and ensures their safe removal from the body.

BIORESONANCE ACTION OF DEVITA RITM BASE

This is similar to electromagnetic oscillations of healthy organs. The organs of our body are constantly affected by pathogenic oscillations and lose their healthy rhythm. DeVita Ritm Base 'readjusts' the organs to the healthy oscillations.

ELECTROMAGNETIC ACTION OF DEVITA ENERGY

The action of this device is based on the principle of 'floating frequencies'; such radiation is quickly and efficiently perceived by the body. That's why the DeVita Energy program after just 10 minutes returns to the body its energy and tone.

DEVITA ENERGY

DeVita Energy is the culmination of the extensive experience of DEHolding's best experts, who united in one program the most efficient frequencies neutralizing stress, increasing body tone and improving the state of the whole body. The principle of 'floating frequencies' was used in the creation of DeVita Energy. Unlike other devices of the DeVita series, which operate at a fixed frequency, DeVita Energy uses variable frequencies which are preferable from the physiological point of view and are better accepted by the body. Within just 10 minutes you are full of cheerfulness and positive vitality. Portability of the device allows its use in practically any situation.

DeVita Energy – is the household appliance designed for your wellness.

RECOMMENDATIONS FOR USE

DeVita Energy device is a generator of weak electromagnetic radiations identical to the radiations present in natural organic systems. It is intended to strengthen the body's own protective abilities and to correct the natural electromagnetic radiation of bio-systems. The principle of corrective action is based on the use of the relevant frequencies in accordance with the methods of R. Rife, R. Voll and F. Morell.

THE MOST DANGEROUS HEALTH PROBLEMS

DEVITA RITM BASE FREQUENCIES

DeVita technologies are based on super-weak electromagnetic radiation which has a positive effect on the body and its organs owing to the bio-resonance phenomenon. DeVita Ritm Base device radiation works as a fading sinusoid.

Such kind of radiation is the most harmonic for health of internal organs.

The electromagnetic waves used in DeVita devices are protected with patents of Deta-Elis Holding.

DEVITA AP BASE

Anti-parasitic action of **DeVita AP Base** device is based on the large-scale studies of R. Rife, the scientist and engineer, and his followers during the century. Scientists have proved that every live creature has its own electromagnetic field. Electromagnetic waves of a certain frequencies resonate with own radiation of a microorganism enhancing its natural fluctuation. Intensive fluctuations kill the parasites. DeVita AP Base device has certain frequencies for certain types of microbes: viruses, bacteria, helminthes, protozoa and fungi, besides, implementing a deep detoxification of the body. DEVITA COSMO

DeVita Cosmo is based on the research in the field of quantum theory of light. Visible light has a wide color spectrum constituted of electromagnetic radiations of different wave-lengths and frequencies. Each color can influence the specific organs or systems through skin receptors. Thus, such coercion is implemented according to reverse-reflex connection on the Zakharyin-Ged zones located on different parts of human body, including: face, neck etc. Due to the reflex effects on the nerve endings and activation of the synthesis of biologically active substances, quantum radiation restores the balance of body systems and helps to restore their functions.

DeVita Cosmo – is the household appliance designed for your wellness.

RECOMMENDATIONS FOR USE

DeVita Cosmo – is cosmetic and health improving device bringing into concord bio-resonance technologies and quantum properties of light. Unlike conventional cosmetic devices DeVita Cosmo acts on the deep skin layers improving it from the inside. The programs of general health improvement could be used for all family members.

DEVITA COSMO IS USED TO HELP:

PRESERVING
THE YOUTHFUL
SKIN

STRENGTHENING
THE HAIR
AND NAILS

SLEANSING THE SKIN
AND RELIEVING
INFLAMMATION

IN GENERAL
IMPROVEMENT
OF HEALTH

RELIEVING
THE
FATIGUE

FEATURES OF THE EFFECT

DeVita Cosmo combines two effects: bio-resonance and quanta of light. The quantum radiation is one of the varieties of electromagnetic radiation. The effect is based on the fact that every human cell contains photo-acceptors which react on the light. The photo-acceptors keep healthy balance inside the cell and under quantum radiation improve metabolic processes and exchange of energy. Quantum radiation has many positive effects: it improves color of the face, hair and skin structure, strengthens nails and helps to heal internal organs.

Advantages of DeVita Cosmo:

- combines the effects of bio-resonance and quantum technologies;
- fights the signs of aging, tightens the skin;
- relieves inflammation, helps with acne and rosacea;
- has beneficial effects for the skin, hair and nails.

CARDIAC RHYTHM AND BODY'S RESOURCES

CARDIAC RHYTHM – is a general body response to the external and internal irritants.

From extreme antiquity, healers learnt to make a diagnosis using cardiac rhythm, to determine illness severity and to project its development. Pulse has four key indicators:

FREQUENCY is the number of cardiac beats within a certain period of time.

RHYTHM is the regularity of consecutive pulse waves.

FULLNESS is the filling up of an artery with the blood ejected by the heart at heart contractions.

PROCLIVITY is the value of applied force for complete compression of the artery.

Using these indicators, one can evaluate general state of health with high precision.

So, cardiac rhythm health testing is therefore one of the most informative.

HOW THE INGREDIENTS FUNCTION

COLLAGEN

Collagen is one of the skin structural proteins. It acts like a skin supporting frame which preserves its elasticity. Collagen is vital for your joints and spine, it provides their flexibility and elasticity. Collagen content in a body decreases with aging, the skin becomes flabby and joints brittle.

DeLixirCollagen + usage will enable you to normalize collagen losses and restore your inner and outer youth.

PH-BALANCE

pH balance is the correlation of acids and alkalis in a body. It is crucial to keep acid-alkaline balance of your internal environment. However, most food that we consume over-acidifies our body. The most food product on our tables such as meat and fish, cheese, sweets, white bread and different sauces are acidic foods.

Over-acidification causes malfunctioning of a body and severe problems. DeLixirPHBalance l helps you to regain the balance.

VITAMINS

Vitamins and minerals are the substances vital for the functioning of your body. Deficiency of them leads to more often sickness and fatigue. We might have health problems. Our body gets all required vitamins and minerals from food. But modern processed food contains very small amount of these importance substances.

DELIXIR ULTRA SLIM+

DeLixir Ultra Slim+ is a beneficial drink that enhances the fight against obesity. Weight gain and obesity can be due to a number of factors. One of them is the inactivation of energetic metabolism and the process of burning fat. In every healthy organism, fatty acids are transferred towards intercellular disintegration with the ultimate purpose of releasing (and creating) energy. In this entire process, choline plays a main role. This nutritional ingredient inhibits the accumulation of fatty cells in the liver and participates in the metabolic process of weight management. Choline also plays a role in the production of L-carnitine, which activates the fat burning process.

DeLixir Ultra Slim + contains L-carnitine, a necessary substance for the body, as well as ingredients that promote the acceleration of metabolism and the release of excess amount of fluids such as: artichoke extract, green coffee, cayenne pepper extract.

Combining the consumption of DeLixir Ultra Slim + with a balanced diet, you will instantly and effectively reduce your weight without any side effect on your health!

BENEFITS DELIXIR ULTRA SLIM

Choline Choline is a nutrient critical to many processes in human metabolism, cell structure and the synthesis of certain neurotransmitters. Scientific studies of years confirm that this particular component contributes decisively to normal metabolism and, extension to the reduction of homocysteine. Homocysteine is an amino acid produced in the body as an intermediate of metabolism, where increased amounts of it in the body are associated with risk of cardiovascular disease.

Liquorice The liquorice for centuries has been used for therapeutic purposes. It is not accidental, therefore, its choice as a «medicinal plant of the year 2012», as according to studies related to Molecular Genetics and carried out by the Max Planck Institute in Berlin, they discovered that the liquorice has antidiabetic activity as they identified a group of natural substances in edible roots of the plant, amorfrutins, which have strong antidiabetic properties. Researchers have also shown that liquorice reduces blood sugar levels and, in combination with its powerful anti-inflammatory properties, makes it an ideal herb for the treatment of complex metabolic disorders.

Cranberries Cranberries are rich in detoxifying benefits that cleanse the lymphatic system, while at the same time improving the healthy flow of the lymph. Since the lymphatic system contributes to the filtration of toxins, it is necessary to consume foods with anti-bacterial activity such as cranberries.

It has been found that cranberries are particularly rich in proanthocyanidins, flavonoids, flavonols, oleic acid, chlorogenic acid, quercetin, myricetin and other substances, all of which are compounds with antioxidant activity, two and five times stronger than vitamins C and E respectively.

from the Academician
of the Russian Academy of Medical
Sciences, Doctor of Medical Sciences,
Professor, President of Gerontologists
and Geriatrists Association of
the Russian Federation Dr. Shabalin:

Health-saving technologies and series of DeVita electromagnetic (bio-resonance) therapy devices by the Russian company DETA-ELIS HOLDING are the perfect example of comprehensive health improvement innovations.

Bio-resonance therapy is a new, rather promising trend in clinical and preventing medicine. The aim of the trend is to evaluate and adjust health state, functional activity and energy resources of human organs and systems.

Strengthening of healthy and weakening of pathogenic electromagnetic oscillations in a human body is the efficient outcome of DeVita technologies which improve life quality. In order to intensify innovative development of health care system of the Russian Federation, to boost the availability and quality of high-tech medical care for ordinary people including elderly persons, to promote the advancement of national innovative projects, also considering the experience and the positive results of DeVita electromagnetic therapy innovative technologies, it is essential to develop scientific research facilities and manufacture of DeVita bio-resonance therapy devices by DETA-ELIS HOLDING for their extensive application.

on DeVita technologies

from the President of the Russian
Academy for Medical and Technical
Sciences, Doctor of Engineering
Sciences, Professor, Honored Scientist
Dr. Leonov:

Health improvement innovations based on bio-resonance therapy are the promising trend in medical rehabilitation. The principle of the method consists of improvement of body functions by means of influence of resonance electro-magnetic oscillations. These oscillations are attributable to eradication of live organisms intended to both neutralization of pathogens and regeneration of healthy oscillations which were impaired at pathogenic conditions, in other words for harmonization of wave processes in a human body.

In this market segment DeVita electro-magnetic therapy technologies of the Russian DETA-ELIS HOLDING Company have very serious positions. DeVita devices are meant for the enhancement of genuine body defenses and correction of natural genuine electro-magnetic radiations of bio-systems.

DeVita technology application is aimed at strengthening of healthy and weakening of pathogenic oscillations in a body, accomplishing health improvement function.

DeVita bio-resonance therapy technologies of DETA-ELIS HOLDING can be widely used for preventive and health improvement purposes. It can be used as an effective extra tool for rehabilitation medicine.

(extract from the interview):

...Thank you for your gift, this device; now I'll do it before the use, and only after that I will take a blood sample in-vitro and will check what it is. But I want to say, what is going on in general. Your operating modes, your waves that you streamline and the movement vector are perfectly right. And I admire the inventor of these modes <...> - you've chosen the right vector. ... Readjustment of both intra-molecular and inter-molecular interactions happens with the help of your oscillating processes.

Of course, I am fascinated by your inventions and devices. We have seen that morphologically. It was so wonderful because from the very beginning it was so unbelievable with some skepticism. But now we are so interested in that. You just sit and work, then you get surprised when see such regularity. The patients have different diseases, that's why the results differ, but the regularity exists, absolutely, in the majority of cases.

Акт приёмки-сдачи

продукции, полученной в результате Договора возмездного оказания
услуг № 111 / 4-III от «17» августа 2015г. между ООО «ДЭТА-ЭЛИС
ХОЛДИНГ» (Заказчик) и ФГБНУ «НИИОПП» (Исполнитель)

Москва, 04.09. 2015 г.

В соответствии с условиями "Договора", "Исполнитель" по заданию
"Заказчика" провел оценку эффективности прибора «DeVita RITM, DeVita AP,
DeVita ENERGY».

Условия проведения исследования:

1. Для исследования взято 20 образцов сыворотки крови больных
терапевтического, эндокринологического, педиатрического, дерматовенерологического и
гастроэнтерологического отделений многопрофильного научно-клинического института г.
Москвы.

2. Сыворотка крови каждого пациента разделена на 6 пробирок по 100 мкл:
0 – контроль (без воздействия);
1 – общий режим;
2 – режим улучшения кровообращения;
3 – режим детоксикации;
4 – режим «Лимфодренаж»;
5 – режим повышения уровня энергии.

3. На каждый образец сыворотки крови (всего 600) было оказано
электромагнитное воздействие аппаратом «DeVita RITM, DeVita AP, DeVita ENERGY» по
заложенным в нём различным программам.

4. После электромагнитного воздействия, методом клиновидной дегидратации
получали твёрдофазные структуры сыворотки крови, в которых оценивали системную и
локальную организацию непосредственно после воздействия электромагнитным полем, и
спустя сутки после воздействия. Полученные результаты сравнивали с контрольными
образцами (группа 0).

Результаты исследований

Изучены морфологические особенности фаций сывороток крови 20 пациентов в
контрольных образцах и после воздействия на них пяти режимов. Сняты 620
микрофотографий в частично-темном поле и в обычном свете при разных увеличениях
стереомикроскопа MZ12 фирмы "Leica" (x10 – x80).

EVALUATION RESULTS

DeVita devices' efficiency based upon blood serum at
Moscow Regional Research and Clinical Institute n.a. M.F. Vladimirov (MONIKI)

Оценка изменений структуры сыворотки крови проводилась по динамике трех морфологических маркеров: хронической интоксикации, воспаления и активации микроциркуляторного русла.

Установлено, что системная организация сыворотки крови всех пациентов проявляла отклик на действие внешнего волнового источника. При этом, структуры сыворотки крови большинства пациентов демонстрировали определённую динамику маркеров после воздействия соответствующего режима:

- 1) морфологические признаки интоксикации при использовании режимов 1, 3, 4 и 5 исчезали или их проявление значительно снижалось;
- 2) маркер активации микроциркуляторного русла статистически значимо выявлялся при воздействии на сыворотку крови режимов 2 и 5;
- 3) маркер воспаления в качестве ответной реакции сыворотки крови на воздействие наиболее четко выявлялся после воздействия режима 5.

Таким образом, волновое электромагнитное воздействие в пяти режимах на сыворотку крови человека показало соответствие изменения структуры сыворотки крови заданному терапевтическому назначению определённого волнового спектра прибора.

Заключение:

1. Аппарат «DeVita RITM, DeVita AP, DeVita ENERGY» оказывает отчетливое влияние на структуру сыворотки крови (по результатам анализа фазий);
2. Характер структурных изменений сыворотки крови соответствует заданным терапевтическим режимам настройки аппарата.
